of Biological Material	9.	

DETAILED ACTION

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patents # 6,150,802 and # 6,600,298 B2, does not teach nor render obvious a control arrangement for controlling an input voltage of a high frequency amplifier that has, in combination with other limitations, a series element disposed upstream from the high frequency amplifier and a switched DC current supply unit with an allocated second control stage, for determining a second control variable from a voltage drop across the series element; nor does it have a method of controlling an input voltage of a high frequency amplifier that has the step of determining a second control variable for a switched DC supply unit from a voltage drop across the series element such that the voltage drop does not exceed a given maximum value and does not fall below a given minimum value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,150,802, # 6,600,298 B2, # 6,411,068 B1, and # 6,201,713 B1 contain some limitations of the claimed invention.
